Sonatrach - Database Engineering Academic Training

3 years | Algiers, Algeria

Focused on SQL database design, relational modeling, query optimization, PHP backend development, Java EE, OOP, algorithms with C++/Java, secure data handling, and backend system structure.

Baccalaureate Level - Algeria

Reached the official national examination level that marks the end of secondary education in Algeria.

INTERSHIPS

- Software Engineering Internship
- Database / IT Internship

LANGUAGES

- Arabic
- French
- English

PROFESSIONAL PROFILE

Full-stack developer with 5 years of coding experience building production-ready web applications with Next.js, React.js, TypeScript, PostgreSQL, and Supabase. Focused on business systems, dashboards, e-commerce platforms, authentication, database architecture, and AI automation tools.

PROJECT EXPERIENCE

Business Systems & Dashboards

Built full-stack business systems with admin dashboards, stock management, sales, expenses, reports, authentication, user roles, and database logic.

E-commerce Platforms

Developed e-commerce platforms with product catalogs, responsive shop pages, order flows, and admin management tools.

Dashboards & Internal Tools

Created internal tools with forms, tables, filters, search, reports, statistics, and user management.

Web Interfaces & Portfolios

Designed modern portfolio websites, landing pages, and interactive web interfaces.

AI & Automation Workflows

Worked on AI-assisted workflows and automation tools designed to reduce repetitive tasks and improve productivity.

STRENGTHS

End-to-end Product Building

From idea to deployment - delivering complete, production-ready solutions.

Strong Full-Stack Logic

Solid understanding across frontend, backend, database, and deployment.

Clean UI Mindset

Focused on user experience, responsive design, and organized code structure.

Fast Learner & Problem Solver

Quick to learn, adapt, debug, and solve complex real-world problems.
